

**National University of Singapore
Department of Microbiology**

Full Professors / Associate Professors / Assistant Professors

The Department of Microbiology is one of the largest departments in the Yong Loo Lin School of Medicine at the National University of Singapore with research in the following areas: Immunology; Virology, Bacteriology; Parasitology. As part of the expansion in medical and life sciences in Singapore, the Department is recruiting faculty whose research is consonant with these fields. The Department has a distinguished history of accomplishments in Microbiology and Immunology research and an excellent team of international researchers in this vibrant academic community. Working in close partnership with the Office of Life Sciences, the Department has also launched a world-class Immunology Programme.

We are inviting applications for the position of Full Professors, Associate and Assistant Professors in the Department of Microbiology.

Person specification

The person should be a high-caliber candidate who possesses a PhD, or an approved basic medical degree with a recognized higher academic /professional qualification. They should have a proven track record in research and teaching at university level. Successful appointees are expected to develop independent research projects and collaborate with other faculties and institutes such as Duke-NUS Graduate Medical School, Genome Institute of Singapore, and Institute of Molecular and Cell Biology.

Remuneration

The remuneration package is internationally competitive. An annual base salary is paid. A market allowance may also be offered, if appropriate as well as a housing and education allowance. Subject to certain criteria being met, a specialist allowance is applicable to clinically-qualified appointees. A Performance bonus is also payable for excellence in teaching and/or service subject to annual review.

Please submit your application, indicating position applied for and current / expected salary, supported by a resume and names of at least 3 referees to:
